American Structurepoint's core purpose of the program is to find the best students in the nation, give them the opportunity to learn about the consulting business, and grow them into future full-time employees. The biggest benefit of the program for the company is the opportunity to hire interns for full-time positions and watch them hit the ground running and really excel in their field.

Interns and co-ops also have opportunities to learn more about the outside influences of the consulting world, as well as having the opportunity to get to know other interns and full-time employees during the annual intern day.

BASE is a full-service structural engineering consulting firm with offices in Hawaii, Chicago, Guam, and Florida. BASE is internationally recognized for a wide variety of high-quality projects and has provided award-winning structural design services for projects worldwide. A small business concern, BASE has the resume of larger firms yet provides the personalized service common in smaller firms. The number of successful design-build and value engineering projects, and most importantly the resultant savings to clients in cost and schedule, are indicative of BASE's attention to economy and constructability. BASE is also experienced in dealing with regional issues including: corrosive tropical environments, high humidity, hurricane/typhoon winds and seismically-active regions.

A future employee would showcase attributes that align with our core values, Grit + Gratitude = Greatness. A student would fit the culture and work ethic of an employee at Richard Group by understanding, possessing, and speaking upon the leadership attributes that go along with each value. Grit is having courage, drive, ability to resolve conflict, and the strength of character through accountability. Gratitude is the ability to serve with humility and in harmony with our gifts, team, and partners. Greatness captures the internal aspiration, the sense of adventure, and achievement. Greatness is a cumulative effort, growing alongside others. At Richard Group we are building to solve the world's greatest challenges and we are looking for A-Players who will excel alongside this mission.

W. M. Lyles Co. is a general engineering contractor that has been serving the California construction industry for over 70 years. With revenues in excess of \$200M, it is the largest member of the Lyles Construction Group, which is listed in ENR's Top 400 Contractors and Top 200 Environmental Firms. W. M. Lyles Co. is active in the public and private infrastructure markets and we focus on the construction of water/wastewater treatment plants, pump stations, pipelines and underground utilities. In order to maintain maximum control of safety, quality, cost, and schedule on our projects, we self-perform earthwork, structural concrete, mechanical/civil piping, and equipment installation. Our estimators and project managers are directly involved in a variety of construction operations.

From its inception in 1991, Weaver Consultants Group has been founded upon the tenets of attentive and responsive customer service, strong project management, and solid internal financial controls. The quality of our people, our focus on understanding and responding to our clients' needs, and our application of good business management practices have resulted in most new projects originating from our existing customer base. Over the years, our professionals have faced the challenges of a constantly changing industry. Shifting federal and state regulations, cultural trends, and technical innovations have vastly impacted the way businesses work. Throughout it all, our team has remained dedicated to our clients, helping to identify pragmatic solutions to help them achieve their business o...

As a specialist in civil / site development since 1960, Weihe Engineers enables its private-sector clients with site development projects across the Midwest to build with confidence. We do this by delivering best-of-class civil engineering, land surveying and landscape architecture services from passionate professionals. As a result, we're experiencing record growth and becoming the preferred firm for students, professionals, and clients alike. Civil / site development is ideal for students wanting to be a well rounded engineer as our projects involve several of the civil focus areas (not limited to just one). If this is of interest to you, then we invite you to learn more about us by visiting weihe.net or contacting Bernie Pesut at berniep@weihe.net and 317-846-6611.

Wessler Engineering is a civil and environmental engineering firm specializing in wastewater, drinking water and stormwater projects providing services ranging from master planning and design to construction administration and asset management plans. Founded in 1975 and based in Indianapolis, Indiana, we have offices in Carmel, Evansville, Fort Wayne and Hobart, Indiana and Bluffton, Ohio.

Wessler's clients include state government agencies, municipalities, counties, industries, and private utilities. While we take great pride in the projects we complete for our clients, we are even prouder of the relationships we build. When we start planning and designing for a client, it is much More than a Project™. The partnerships we create are just as important as the projects themselves. W...
